

Put together your own training programme

Structure

Mandatory module	Requirements on personal protective equipment	
Free selectable modules Full day: choose 3 modules Half day: choose 1 to 2 modules	Standards and specifications for PPE and contamination	Workshop: Application of PPE
	Spill-Kit training	Customised module according to customer requirements and application

Content

Requirements on personal protective equipment

What must be considered when using personal protective equipment?

What limits and durations of use must be followed?

Duration: 1h | Mandatory

Standards and specification for PPE and contamination

What does the new EU GMP Annex 1 require and which standards are mandatory for personal protective equipment? Duration: 0:45h

Workshop: Application of PPE

How do I use PPE correctly? We will show you typical mistakes and give you advice.

Duration: 2h

Spill-Kit training

How is the spill kit used correctly? What to look out for and practical application.

Duration: 1h

Customised module according to customer requirements and application

We will put together a customised module for your specific application.

Duration: 1h

Additional information

- We are happy to organise training courses at the SKAN premises in Allschwil or directly at your company.
- The training can be organised in German or English.
- We will be happy to discuss the costs of the training individually on request.
- Registration and contact: psa@skan.ch / +41 79 791 38 92 to David Marek
