

skan

360° service for complete safety

skan.com/puresolutions

Why choose SKAN?

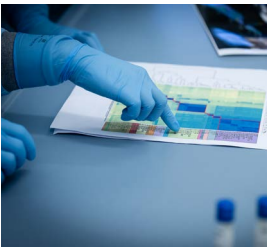

We understand the customer's processes

Our technicians have an in-depth understanding of customer processes. With both training and experience in feed-in processes, they have wide-ranging cleanroom expertise and know how to operate in sensitive environments.

Training, Academy

We share our extensive experience and know-how in advanced training courses, both in house and at the customer's premises. Our technicians complete a training programme to ensure that they are optimally prepared to work for every customer.

Compliance with standards

Thanks to our in-house standards experts, who are members of international committees, we can guarantee compliance with the latest standards and guidelines.

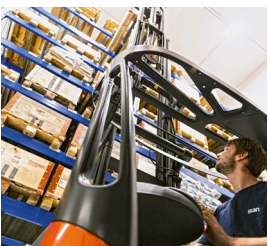

Documentation

From qualification documents to measurement data and reviews, we create accurate, multilingual documentation tailored to the individual customer.

SKAN service fleet

Every technician has a fully equipped service vehicle, enabling us to respond rapidly to your requirements.

Regional warehouses

Our technicians can be on site quickly thanks to our regional warehouses in western, central and eastern Switzerland.

Service for clean environments and laboratories

Our services promise 360° safety.

With their expertise and practical experience, SKAN's highly trained specialists make sure the job is carried out smoothly.

If anything unexpected happens, they will find a solution.

We go the famous extra mile: because it's important to us to offer an extensive range of services and innovation, we not only meet, but exceed the customer's expectations.
